Summary

Engineering change and PLM professional with 7+ years owning ECR/ECO/ECN processing, BOM management, document control, and PLM/ERP data integrity for CTO/MTO discrete manufacturing, translating engineering drawings and EBOMs into manufacturing BOMs. Released 120+ engineering changes per month at 99.5% on-time completion, cutting cycle time by 45%.

Work Experience

- **Product Owner | Bantrly | Plano, TX** *Feb 2026 – May 2026*
  - Owned scope and release decisions for a new AI B2B product end to end, consolidating input from 15+ customer and stakeholder interviews into documented requirements, prioritized changes, and testable acceptance criteria for engineering.
  - Delivered the MVP within 3 months with zero release rollbacks by cutting scope by 50% to core functionality, gating every release on acceptance criteria, and coordinating engineering and design through agile sprints in Jira and Confluence.
  - Cut manual documentation effort by 40% by automating documentation workflows with LLM agents in n8n, and validated scope on a working prototype built with Claude in VS Code, avoiding an estimated 3+ weeks of engineering rework.
- **Product Information Analyst | MillerKnoll (formerly Herman Miller) | Bangalore, India** *Feb 2020 – Dec 2023*
  - Released 120+ engineering changes (ECR/ECO/ECN) per month at 99.5% on-time completion as product owner and technical liaison, cutting cycle time by 45%, from 12 days to under 7, by standardizing intake and approval sequencing.
  - Reduced quoting errors by 30% for North American B2B dealers and OEMs as single-point owner of order fallout, leading cross-functional root-cause analysis of configuration failures with engineering, manufacturing, and sales teams.
  - Ran change impact analysis in PLM for each ECR across affected parts, parent-child BOMs, and downstream systems, then implemented approved ECOs as effectivity-dated updates in Infor LN PCF, Infor CPQ, and order management systems.
  - Translated engineering drawings and EBOMs into generic (150%) MBOMs and routings with effectivity, creating part and assembly numbers under revision control, validating every change through UAT, and training sales and B2B dealer users.
  - Controlled part lifecycle and SKU orderability states from NPI through sustaining engineering to obsolescence across 7 brands, blocking superseded and unsupported parts from customer orders and managing component end-of-life risk.
  - Improved operational efficiency by 34% as owner of CMF master data for the APAC and EMEA region product portfolio, harmonizing color, material, and finish records across Infor LN and Infor SyteLine during the ERP data migration.
- **Founder | Gogetters | Navi Mumbai, India** *Sep 2018 – Jan 2020*
  - Launched a self-funded D2C brand on its own storefront and marketplaces, growing monthly revenue 3x at a 38% gross margin over 15 months by negotiating better terms with 12 suppliers and cutting acquisition cost by 30%.
- **Senior Analyst | Lumina Datamatics | Navi Mumbai, India** *Jun 2016 – Aug 2018*
  - Built and maintained multi-level CTO BOMs and rule-based variant models for 5,000+ configurable HVAC, motor, and power-equipment products, defining the features, options, and compatibility constraints released to production.
  - Cut configuration errors in production by 30% by validating every rule change through test configurations before release, blocking unbuildable combinations across 5,000+ configurable products from reaching the manufacturing floor.
- **Configuration Associate | Reliance Jio (Contract) | Navi Mumbai, India** *Feb 2015 – May 2016*
  - Processed 50+ engineering changes per month in PLM at 99% on-time completion with zero escapes, updating BOMs and part data for 300+ identity access controller variants (HID, Sterna); validated every new option rule through test configurations before each release to sales, keeping the product configurator aligned with released engineering data.

Education

- **Northeastern University** *San Jose, CA*
  Master of Science in Information Systems, GPA 3.87/4.0 *Jan 2024 – Dec 2025*
- **University of Pune (MIT Pune)** *Pune, India*
  Bachelor of Engineering in Electronics and Telecommunications *May 2010 – May 2014*

Skills

- **Change and Configuration Management:** Engineering change (ECR/ECO/ECN), change impact analysis, document control, revision control, effectivity, BOM management, EBOM to MBOM, routings, NPI, obsolescence, master data governance
- **Systems:** Infor LN Product Configurator (PCF), Infor LN ERP, Infor SyteLine ERP, Infor CPQ, PLM, PDM, CET, pCon
- **Data and AI:** SQL, Power BI, Tableau, Excel, LLM workflow automation and AI agents (n8n), OpenAI and Claude API integrations, prompt engineering, AI-assisted coding (Claude Code)
