Summary

Product owner with 7+ years in CTO/MTO discrete manufacturing, owning the product lifecycle from NPI through obsolescence and B2B dealer channel pricing across 7 brands, improving time-to-market by 22% and cutting quoting errors by 30%. Led an AI B2B product from customer discovery to launch within 3 months, securing paying pilots and lifting activation from 45% to 80%.

Work Experience

- **Product Owner | Bantrly | Plano, TX** *Feb 2026 – May 2026*
  - Owned product strategy end to end, choosing the best of 3 problem areas through market research, competitive analysis, 15+ voice-of-customer and stakeholder interviews, and customer-site demos, then building the founders' business case.
  - Launched the MVP within 3 months and secured 2 paying pilot customers with zero release rollbacks by owning the roadmap, PRD, backlog, and go-to-market, cutting scope by 50% to core functionality, and enforcing acceptance criteria.
  - Owned post-launch adoption, raising pilot user activation from 45% to 80% within 6 weeks by defining product usage KPIs, leading weekly pilot reviews with customer teams, and prioritizing fixes for the top 3 drop-off points in the user journey.
  - Ran agile sprints in Jira and Confluence with engineering and design, ranking the backlog by impact and effort, separating stated requests from underlying business problems, and cutting documentation effort by 40% with n8n automation.
- **Product Information Analyst | MillerKnoll (formerly Herman Miller) | Bangalore, India** *Feb 2020 – Dec 2023*
  - Owned the configuration rules and business logic behind Infor CPQ and order management as product owner for CTO/MTO product lines, translating engineering, manufacturing, and commercial requirements into product decisions.
  - Reduced quoting errors by 30% and protected multi-million-dollar order flow as single-point owner of order fallout for North American B2B dealers and OEMs, leading root-cause analysis with engineering, manufacturing, and sales teams.
  - Improved new-portfolio time-to-market by 22% by building SQL and Power BI launch-readiness dashboards that gave cross-functional leaders visibility into every launch and sequenced releases for New Product Commercialization (NPC).
  - Cut engineering-change cycle time by 45%, from 12 days to under 7, while sustaining 99.5% on-time release across 120+ engineering changes per month by standardizing intake, sequencing approvals, and prioritizing by risk and business impact.
  - Managed the product lifecycle and SKU orderability from new product development and NPI through sustaining engineering to obsolescence across 7 brands, blocking superseded parts from customer orders and managing end-of-life risk.
  - Drove adoption of every configurator release by validating rule changes through UAT, documenting rules in decision tables, and training sales and B2B dealer users; cut pricing audit cycles by 25% with SQL checks on multi-currency price books.
- **Founder | Gogetters | Navi Mumbai, India** *Sep 2018 – Jan 2020*
  - Launched a self-funded D2C brand on its own storefront and marketplaces, growing monthly revenue 3x at a 38% gross margin over 15 months by negotiating better terms with 12 suppliers and cutting acquisition cost by 30%.
- **Senior Analyst | Lumina Datamatics | Navi Mumbai, India** *Jun 2016 – Aug 2018*
  - Turned product requirements into rule-based variant models for 5,000+ configurable HVAC, motor, and power-equipment products, defining the features, options, and compatibility constraints governing every orderable product combination.
  - Cut configuration errors in production by 30% by structuring multi-level CTO BOMs for each product family and testing every rule change before release, preventing unbuildable combinations from reaching customers or production.
- **Configuration Associate | Reliance Jio (Contract) | Navi Mumbai, India** *Feb 2015 – May 2016*
  - Maintained option rules and configuration models for 300+ identity access controller variants (HID, Sterna), validating each new rule through test configurations before release to sales and completing 50+ engineering changes per month to BOMs and part data in PLM at 99% on-time completion with zero escapes, ensuring accurate sales quotes for every variant.

Education

- **Northeastern University** *San Jose, CA*
  Master of Science in Information Systems, GPA 3.87/4.0 *Jan 2024 – Dec 2025*
- **University of Pune (MIT Pune)** *Pune, India*
  Bachelor of Engineering in Electronics and Telecommunications *May 2010 – May 2014*

Skills

- **Manufacturing Systems:** Infor CPQ, Infor LN Product Configurator (PCF), Infor LN ERP, Infor SyteLine ERP, PLM, product configuration, CTO/MTO, engineering change (ECR/ECO/ECN), BOM management, master data governance
- **Data and AI:** SQL, Power BI, Tableau, Excel, LLM workflow automation and AI agents (n8n), OpenAI and Claude API integrations, prompt engineering, AI-assisted coding (Claude Code)
- **Tools:** Jira, Confluence, Figma, Miro
